Education

Bachelor's Degree in Computer Science, *Canadian International College* Cairo, Egypt
Major: Cloud and Mobile Computing

Experience

Software Engineer, *YOUXEL Technology* 01/2026 – Present
Al Maadi, Egypt

- Develop and maintain full-stack features for a SaaS web application using React and Node.js
- Collaborate with cross-functional teams to translate product requirements into functional, user-facing features
- Write clean, reusable components and contribute to improving frontend architecture and code quality
- Participate in code reviews, providing and receiving constructive feedback to maintain high standards
- Debug and resolve issues across the stack, ensuring performance and reliability of the application
- Contribute to backend API development and integration with frontend services

Frontend Engineer, *YOUXEL Technology* 09/2025 – 01/2026
Al Maadi, Egypt

- Built responsive and accessible UI components using React for a SaaS platform
- Collaborated with designers to implement pixel-perfect interfaces from Figma mockups
- Integrated RESTful APIs to connect frontend views with backend data and services
- Identified and fixed cross-browser compatibility issues to ensure consistent user experience
- Participated in agile ceremonies including sprint planning, standups, and retrospectives
- Assisted in optimizing page load performance through code splitting and lazy loading techniques

Project

Stock Market (Nest Invest)

Graduation Project Grade: A

- Nest Invest is a web application that allows users to buy and sell stocks using a virtual budget with the assistance of a powerful AI prediction model in addition to accessing stock market data and charts, simulating the investing process in a simplistic way.
- The technology used in this project MERN stack.
- The role I play in this project is front-end.
- The libraries used to build front end: Tailwind CSS, Rechart, React Context API, React Router, React Table, React Icon, React Hot Toast, Axios HTTP and React Query.

Hotel management system project (The Wild Oasis)

- The Wild Oasis is a full-featured React web application that allows hotel employees to manage cabins, bookings.
- The technology used in this project React for front-end and Supabase for back-end.
- The libraries used to build front end: Styled Components, React Context API, Rechart, React Query, React Router, React Icon, React Hot Toast, React Hook Form and React Error Boundary.

HR-System

- The system is designed to manage employee data and track attendance efficiently.
- Frontend: React.js with TypeScript, Vite, React Router DOM, Tailwind CSS, Axios.
- Backend: Node.js with TypeScript, Express, MongoDB with Mongoose, JWT, bcryptjs.
- This project is a full-stack HR System that enables:
 - Employee management (add, edit, delete, and view employee records).
 - Attendance tracking (daily recording and history management).
 - Secure authentication and responsive design for an intuitive user experience.

Memories

- The site works as a social media application. Share your memories, like others' memories, and you can create, edit, and delete your memories.
- Features: Register, Login, Add Post (Authorized), Update Post (Authorized), Delete Post (Authorized), Like Post (Authorized), Get All Posts, Protected Route, Error Handling.
- Libraries usage:
Frontend: React.js, Redux, Axios HTTP, React Router, Mui/material, jwt-decode. Backend: Mongoose, Node.js, Express.js, JWT, Dotenv, Cors, Bcryptjs. Database: MongoDB

Course-Express

- A simple courses project Node.js
- Features: Register + upload user avatar, Login, Add courses (Authorized user), Update course, Delete course (Authorized admin or manager), Get all courses, Get all users (Authorized user), Protected Route, Error handling.
- Libraries usage: mongoose, Express.js, Express-Validator, Validator, Multer, dotenv, cors, bcryptjs.

Technical Skills

Programming Languages

HTML, CSS, SASS, Java, JavaScript, C++, C, C#, Python.

Databases

MySQL, MongoDB.

Other

Supabase, Linux Standard Base.

Frameworks & Libraries

MERN, Next.JS, Node.js, Express.js, Mongoose, Sequelize, Express Validator, Validator, Socket.io, Json Web Token (JWT), Bcrypt.JS, Multer, React.JS, Redux, Tailwind CSS, Styled components, CSS Modules, Rechart, Axios HTTP, React query, React Table, React Context API.

Concepts

Data Structures, Algorithms, Object Oriented Programming, Problem Solving, Design Patterns, Software Design, Software Architecture, Software Testing, RESTful API.

Soft Skills

- | | |
|------------------------------|------------------------------------|
| • Attention to Detail | • Communication Skills |
| • Quality Assurance Focus | • Process Documentation |
| • Complexity analysis | • Problem Solving |
| • Teamwork and Collaboration | • Time Management and Organization |
